Management's Discussion and Analysis

The following discussion is management's assessment and analysis of the results and financial condition of BeMetals Corp. ("BeMetals" or the "Company"), and should be read in conjunction with the accompanying unaudited condensed interim consolidated financial statements and related notes. The preparation of financial data is in accordance with International Accounting Standard 34 - Interim Financial Reporting (IAS 34) using accounting policies consistent with International Financial Reporting Standards ("IFRS") and all figures are reported in Canadian dollars unless otherwise indicated. The effective date of this report is August 27, 2024.

Business Overview

BeMetals is a base and precious metals exploration and development company that has an option agreement to acquire a majority interest in the Pangeni Copper Project in Zambia (the "Pangeni Copper Project" or "Pangeni") and a portfolio of wholly owned gold projects in Japan (the "Kazan Gold Projects"). The Pangeni Project is located on the western extension of the prolific Zambian Copperbelt, which has seen increased interest from prominent mining companies in the past year. Results from the Company's early 2024 drilling program at Pangeni have been the most compelling to date and included an intersection of 16.16 metres grading 0.74% copper (see 'Pangeni Copper Project' below). The Kazan Gold Projects are an expertly selected portfolio of five projects located in Japan, a country which is renowned for its historical high-grade gold mines (see 'Kazan Gold Projects' below). B2Gold Corp. ("B2Gold") has been a strategic investor in BeMetals since 2021 following the acquisition of the Kazan Gold Projects in Japan by the Company, and an accompanying equity financing whereby B2Gold subscribed for \$7.5 million as part of the Kazan acquisition. B2Gold Corp. currently holds approximately 24.5% of BeMetals' outstanding shares.

The Company continues to advance its high-quality portfolio of mineral exploration projects through well-managed technical programs with prudent deployment of funding and its ability to raise future funding as appropriately required. In addition, the Company will continue to evaluate other potential precious and base metal acquisition opportunities utilizing the Company's extensive worldwide network, experience, and track-record in the mining business.

Founding directors of the Company include John Wilton (President and CEO), Clive Johnson, Roger Richer and Tom Garagan. In July 2020, Mark Connelly joined the Board as Non-Executive Chairman and director. The Board is joined by Derek Iwanaka (VP of Investor Relations and Corporate Development), Nick Furber (CFO), and Kristen Reinertson

BeMetals Corp.

Management's Discussion and Analysis of Financial Condition and Results of Operations June 30, 2024 and 2023

(Corporate Secretary and a director). Dr. Richard Sillitoe, one of the world's foremost economic geological experts on precious and base metal deposits, provides technical input for the Company's current projects and new project assessments as an advisor. Dennis Stansbury, a highly experienced mining engineer, and currently Sr. VP of Engineering and Project Evaluations with B2Gold Corp., also serves as a technical advisor to BeMetals.

The Company's shares are listed on the TSX Venture Exchange ("TSX-V") under the symbol 'BMET', and they trade on the OTCQB in the U.S.A. under the symbol 'BMTLF', as well as on the Frankfurt Stock Exchange in Germany under the symbol '10I.F'.

Since listing on the TSX-V, the Company has, through equity financings, successfully raised a total of approximately \$30 million through private placements and the exercise of warrants. The Company entered into a loan agreement with B2Gold for an unsecured loan in the principal amount of US\$5 million in August 2022 and in September 2023 and January 2024 B2Gold acquired Convertible Debentures totaling \$5.3 million, in aggregate. Most recently, B2Gold made a further equity investment of \$2.2 million in July 2024 through the Company's latest private placement financing of \$4.8 million in aggregate (see 'Liquidity and Capital Resources' below).

The Company has incurred losses since inception and has no source of recurring revenue. The success of the Company is dependent upon the ability of the Company to obtain necessary financing to continue their exploration and development activities, the confirmation of economically recoverable reserves, and upon establishing future profitable production, or realization of proceeds on disposal. The Company will require additional funding to maintain its activities and operations for the next twelve months. All of the preceding indicates the existence of a material uncertainty that may cast significant doubt on the Company's ability to continue as a going concern.

Pangeni Copper Project

Exploration Highlights

The Pangeni Copper Project is located on the western extension of the Zambian Copperbelt, within the Lufilian Arc, underlain by Katangan Supergroup metasediments situated unconformably on basement schists and gneisses, which are covered by a thin veneer of Kalahari sands. The open-pit Sentinel Copper Mine is operated by First Quantum Minerals Ltd. some 130 kilometres to the northeast of the Pangeni Project. A number of major international mining companies have identified this region of the Zambian Copperbelt to be prospective for the discovery of tier one copper mines and are also conducting extensive exploration work in this area. Exploration activities for 2023 and up to the date of this report are summarized below.

In May 2024, the Company reported the analytical results for the first four holes of a six-hole core drilling program designed to identify zones of higher grades and extend zones of discovered copper mineralization at the D-Prospect area of the Pangeni Copper Project in Zambia. This program was pro-rata co-funded (27.8%) by the Japan Organization for Metal and Energy Security Corporation ("JOGMEC"). These drill intersections meet or exceed the widths and grades of deposits forming large scale copper mines and projects within the Domes Region of the prolific Zambian Copperbelt. The mineralization remains open along strike in both the SW and NE directions as well as down dip to the SE with additional exploration targets in close proximity to the D-Prospect. The Pangeni Project continues to deliver compelling results, indicating significant scale to the mineralization, and with ongoing drilling success, the potential for the discovery of a tier one copper deposit beneath the Kalahari sand cover.

HIGHLIGHTS FROM THE EARLY 2024 PROGRAM AT THE D-PROSPECT INCLUDED THE FOLLOWING:

- **Hole D24-C1 intersected 16.16 metres grading 0.74% copper ("Cu") with 533 parts per million "ppm" cobalt ("Co"), including 5.50 metres grading 0.93% Cu with 701ppm Co.**
- **Hole D11-C3 intersected 23.20 metres grading 0.54% Cu with 263ppm Co, including 7.90 metres 0.92% Cu with 453ppm Co.**
- **Hole D22-C2 intersected 14.78 metres grading 0.42% Cu, including 4.88 metres grading 0.65% Cu.**

BeMetals Corp.

Management's Discussion and Analysis
of Financial Condition and Results of Operations
June 30, 2024 and 2023

- The intercepts in Holes D24-C1, D11-C3 and D22-C2 have copper grades and mineralized widths that approximate or exceed those of certain large-scale copper mines in the Domes Region of the Zambian Copperbelt
- The D-Prospect copper mineralization has a number of the hallmarks in terms of the width and grade of the drilled intersections and geological features of the large-scale Lumwana Copper Mine deposits in the Domes Region of the Zambian Copperbelt.
- The footprint of copper mineralization now extends for more than 1.7 kilometres along strike, with the mineralized intervals present from immediately beneath the sand cover, at approximately 25 metres depth, to some 275 metres vertically.
- Mineralization remains open along strike in both the SW and NE directions as well as down dip to the SE.

In January 2024, the Company reported an intersection of 18.10 metres grading 0.70% Cu in Hole **D22-C1**. This zone is characterized by consistent copper sulphide mineralization, comprising disseminated and veinlet chalcopyrite and subordinate bornite. It is generally hosted within a scapolite and kyanite bearing schist unit. It has been named the Nkala Zone. The Nkala Zone is now interpreted to extend for at least 1.1 kilometres along strike within the overall 1.7 kilometres of known copper mineralization. In the southwest of the currently drilled prospect, it has increased widths and copper grades in a lens or shoot currently termed the Ingwe Shoot.

To-date, **Hole D24-C1** is the southwestern most hole to have encountered copper mineralization in the Nkala Zone, with an intersection of 16.16 metres grading 0.74% Cu and 533 ppm Co, including 5.50 metres grading 0.93% Cu and 701 ppm Co. Hole **D22-C2** intersected 14.78 metres grading 0.42% Cu some 110 metres to the northeast of D24-C1, and Hole **D11-C3** intersected 23.20 metres grading 0.54% Cu with 263 ppm Co, including 7.90 metres at 0.92% Cu, a further 500 metres east-northeast of Hole **D24-C1**.

There are now four drill holes **D24-C1**, **D22-C2**, **D11-C3**, and previously reported **D22-C1** that all intersected the interpreted Ingwe Shoot of the Nkala Zone, with copper grades that approximate or exceed those of several large-scale copper mines and projects in the Domes Region of the Zambian Copperbelt. The Ingwe Shoot, with higher-grade copper and associated cobalt mineralization, is interpreted to be structurally controlled, similar in style to the Equinox, Chimiwungo Main and East Shoots at the Lumwana Mine.

Last year's project exploration included drilling on the D-Prospect area of the Project which comprised 2,032 metres of shallow air core drilling to test for bedrock copper anomalies below the Kalahari sand cover, and 787 metres of follow-up core drilling in three holes (D22-C1, D14-C1, and D11-C1).

HIGHLIGHTS FROM THE 2023 DRILLING PROGRAM AT THE D-PROSPECT INCLUDED THE FOLLOWING:

- **Drill hole D22-C1 intersected 18.10 metres grading 0.70% copper along with other intervals of copper mineralization.**
 - This copper intersection grade exceeds the grades of certain operating, large-scale, copper mines in the Domes Region of the Zambian Copperbelt ⁽¹⁾ ⁽²⁾ and its width is similar to mineralized units in these deposits ⁽³⁾.
 - This intersection is open along strike to the southwest and west, and both up and down dip beneath the Kalahari sand cover
- **Drill hole D14-C1: Returned multiple zones of copper mineralization from a shallow, approximately 70 metres, vertical depth**
 - **D14-C1: Interval 1: 69.41 metres grading 0.25 % copper ("Cu"), including: 12.91 metres grading 0.37% Cu, and Interval 2: including 12.64 metres grading 0.32% Cu with 7.64 metres grading 0.39% Cu**
- **The mineralization, and associated alteration discovered at the D-Prospect to date, currently traced over 1.5 kilometres along strike, shows many of the hallmarks of large-scale copper deposits mined in the Domes Region of the Zambian Copperbelt**

About the Pangen Copper Project

The Pangen Licence is geologically prospective for the following deposit types; Basement-hosted Cu (analogues: the Lumwana Deposit, Nyungu Prospect), Sediment-hosted stratiform Cu-Co (analogues: Nchanga, Konkola, Nkana, and Mufulira Deposits), other Domes Region Deposits e.g. Sentinel, and Kansanshi and DRC Copperbelt Deposits e.g. Lonshi, Frontier, Kamo-Kakula).

In March 2021, BeMetals entered into a Joint Exploration and Option Agreement (the "JOGMEC Agreement") with Japan Oil, Gas and Metals National Corporation (JOGMEC recently changed its name to the Japan Organization for Metals and Energy Security) that provided an initial investment of US\$1.5 million for money-in-the-ground exploration at the Pangen Copper Project with additional ongoing pro-rata contributions. This ongoing investment from JOGMEC is helping to accelerate exploration at the property. Further information on this agreement with JOGMEC is detailed below.

An independent technical report for the Pangen Copper Project, prior to the drilling campaigns from 2019 to present, has been completed by African Mining Consultants Limited, effective April 10, 2018, and is available on the Company's website and under the Company's profile on SEDAR+ at www.sedarplus.ca.

Terms of the Pangen Option Agreement

In February 2018, further to a November 2017 letter agreement, the Company confirmed the agreement (the "Pangen Agreement") with Copper Cross Zambia Limited (the "Pangen Vendor") for the right to acquire up to a 72% interest in the Pangen Copper Project. This agreement and the transactions pursuant thereto (the "Pangen Transaction") was approved by the TSX-V in July 2018 in connection with the Company's completion of its qualifying transaction. Subsequently, the Company has made certain amendments to the Pangen Agreement as announced in January 2020 and June 2023.

Pursuant to the Pangen Agreement, and including the January 2020 and June 2023 amendments, the Company can acquire an initial 67.5% interest in the Pangen Copper Project by:

- (a) making cash payments of US\$250,000 and issuing a total of 780,500 common shares by February 2020 (completed);
- (b) spending US\$2,500,000 in exploration work by December 31, 2020 (completed);
- (c) making a cash payment of US\$100,000 by mid-June 2023 (completed);
- (d) making a cash payment of US\$350,000, of which up to US\$225,000, at the Company's option, may be satisfied by the issuance of the Company's common shares by mid-June 2024 (extended to 26th September, 2024)
- (e) completing a Preliminary Economic Assessment ("PEA") by (i) mid-June 2025 or (ii) any future date thereafter provided that the Company incur or fund not less than US\$2,000,000 of expenditures on the Pangen Copper Project annually, by mid-June of each year, until the completion of the PEA; and
- (f) making a payment of US\$700,000 as an advanced royalty reduction payment.

Following acquisition of the initial 67.5% interest (Subject to the JOGMEC agreement below) the Company can acquire an additional 4.5% interest by completing a Feasibility Study and making a further cash payment of US\$750,000 (a portion of which may be paid in common shares of BeMetals at the option of the Company).

BeMetals Corp.

Management's Discussion and Analysis of Financial Condition and Results of Operations June 30, 2024 and 2023

At the commencement of the mine development phase, and following a feasibility study, a one-off milestone payment is payable, based upon total proven and probable mineral reserves, as follows: US\$2,000,000 if less than 500 kilotonnes ("kt") contained copper, US\$3,000,000 if the contained copper is between 500 kt and 1,000kt, and US\$6,000,000 if greater than 1,000kt contained copper. Upon commencement of production, Pangeni Mineral Resources Limited ("Pangeni Mineral") is entitled to a 3% Net Smelter Royalty (which may be reduced to 2.5% following the US\$700,000 royalty reduction payment above and further reduced to 1% following an additional royalty reduction payment by the Company, determined by an internationally recognised valuator, which is not to exceed US\$3,300,000).

Terms of JOGMEC Agreement

Under the terms of the JOGMEC Agreement, by March 31, 2021 JOGMEC funded US\$1,000,000 for exploration expenditures by way of payment to BeMetals for exploration activities completed in the 2020 field program. This payment was received in March 2021. During 2021, JOGMEC also funded an additional US\$ 500,000 in exploration expenditures (completed in August 2021), after which JOGMEC has been deemed to have earned a 27.8% interest in BeMetals' option to acquire up to a 72% interest in the Pangeni Project. Upon earning its interest in the BeMetals option, for the remainder of the agreed future exploration programs, JOGMEC funds exploration expenditures pro-rata in accordance with its 27.8% interest. In total therefore, JOGMEC has solely funded US\$ 1,500,000 of exploration expenditures, and thereafter is funding exploration expenditures pro-rata in accordance with its proportionate interest in the BeMetals option for the property. The above investments will provide JOGMEC with rights to an approximately 20% stake in the Pangeni Project assuming the full exercise of all applicable underlying parties and optionees and BeMetals will retain rights to approximately 52%. BeMetals retains overall management control through the project's technical committee and its majority option position in the Pangeni Project.

Off-take Option Rights

Provided JOGMEC maintains its 27.8% interest in the BeMetals option through pro-rata funding of its proportionate share of exploration expenditures until December 31, 2024, it will have earned a First Off-take Option, whereby, through annual Right of First Offer ("ROFO") and Right of First Refusal ("ROFR") provisions, JOGMEC will have the right to purchase up to 30% of the off-take from any mining operation on the property. JOGMEC would be entitled to exercise such ROFO/ROFR rights beginning on December 31, 2024 until the 10-year anniversary of the commencement of commercial production (with any purchases of off-take to begin on the commencement of commercial production).

Furthermore, should JOGMEC maintain at least a 10% interest in the Pangeni Project at the time a production decision is made for the Pangeni Project, it will be entitled to an additional Second Off-take Option, whereby, through an annual ROFR right, JOGMEC will have the right to purchase up to an additional 20% of the off-take from any mining operation on the property (for an aggregate 50% purchase right). JOGMEC would be entitled to exercise such Second Off-take ROFR rights beginning on the date a production decision is made until the end of the life of mine on the property (with any purchases of off-take pursuant to the Second Off-take Option to begin on the commencement of commercial production). If this Second Off-take Option is earned by JOGMEC, the term of the Off-take Option will also be extended, such that it will continue until the end of the life of mine. The remaining 70% or 50%, as applicable, of production from any mining operation remains unencumbered by JOGMEC's rights.

Summary of Exploration Expenses

The following table summarizes the exploration costs associated with the Company's Pangeni Copper Project as at June 30, 2024 and December 31, 2023:

BeMetals Corp.

Total	\$ 7,033,603	\$ 1,212,618	\$ 8,246,221

Kazan Gold Projects

The Company acquired the Kazan Gold Projects in April 2021. The Kazan Gold Projects are an expertly selected portfolio of five wholly owned gold properties in Japan, including the more advanced exploration-stage Kato Project in Hokkaido. Kazan assembled this land position covering extensions and similar geological terrains known to have hosted numerous historical high-grade mines including, but not limited to, the currently operating Hishikari Gold Mine on Kyushu, which produced 7.9 million ounces of gold from 1985-2020 at an average grade of 30-40 grams per tonne gold.

Kazan has the rights to explore a total of five project areas in Japan. In addition to the Kato Project, these properties include the Todoroki and Konomai projects also on Hokkaido, as well as the Tashiro and Hokusatsu projects on Kyushu. A number of these project areas were subject to, or have adjacent, historical high-grade gold mining operations.

The Kato Gold Project

("Kato" or the "Kato Project") is currently the "most advanced exploration" project and covers close to 2,000 hectares in central Hokkaido.

Exploration Results

In July 2023, BeMetals announced assay results for an initial six holes from its 2023 drilling program at Kato. Last year's drilling campaign at Kato, focused on extending the gold mineralization found along the south-easterly trending Seta and Kamitake veins, where a total of nine holes for approximately 2,725 metres were completed during the 2023 phase of exploration drilling. The results from the Kato holes returned multiple zones of epithermal gold mineralization related to the Seta, Kamitake and other new vein zones intersected southwest of the Seta and Kamitake veins. Based on the results to date, there appears to be a wide corridor of gold vein mineralization on the Kato Project with dimensions of at least 200 metres wide and 1.3 kilometres in strike extent. The results from the remaining three holes at Kato were released in January 2024 and returned lower grade intersections than the initial holes, however the additional data from all the 2023 phase of drilling will be used to update the geological model of the Kato mineralization and assist in defining additional targets for future drilling at the Kato corridor as well as for other untested targets on the Kato Project.

BeMetals Corp.

Management's Discussion and Analysis
of Financial Condition and Results of Operations
June 30, 2024 and 2023

HIGHLIGHTS OF THE 2023 DRILLING RESULTS AT KATO INCLUDED:

- **KT23-19: Interval 1:** 6.40 metres ("m") grading 1.74 g/t grams per tonne ("g/t") gold ("Au") and 5.4 g/t silver ("Ag")
 - *Including:* 1.70 m grading 5.58 g/t Au and 11.5 g/t Ag
- **Interval 2:** 5.60 m grading 3.29 g/t Au and 7.9 g/t Ag
 - *Including:* 1.00 m grading 9.46 g/t Au and 17.6 g/t Ag
 - *Also including:* 0.43 m grading 9.65 g/t Au and 8.7 g/t Ag
- **KT23-20: Interval 3:** 13.55 m grading 1.19 g/t Au and 18.32 g/t Ag
 - *Including:* 1.95 m grading 3.55 g/t Au and 21.66 g/t Ag
- **KT23-18: Interval 2:** 10.54 m grading 1.28 g/t Au and 17.4 g/t Ag
 - *Including:* 1.37 m grading 4.48 g/t Au and 75.5 g/t Ag
- **Interval 5:** 6.70 m grading 2.48 g/t Au and 36.1 g/t Ag
 - *Including:* 1.90 m grading 7.50 g/t Au and 91.7 g/t Ag
- **KT23-17: Interval 3:** 3.60 m grading 2.12 g/t Au and 14.9 Ag
 - *Including:* 1.00 m grading 6.31 g/t Au and 17.8 g/t Ag
- **Interval 6:** 3.15 m grading 1.18 g/t Au and 7.7 Ag
 - *Including:* 0.75 m grading 3.32 g/t Au and 13.0 g/t Ag

In December 2022 BeMetals completed its initial 2,000 metre drilling campaign at Kato and in January 2023, the Company announced the remaining assay results from its 2022 program including, holes KT22-13 and KT22-15 which extended the Seta and Kamitake veins to the southeast. The relatively lower gold grade of the KT22-13 & KT22-15 intersections compared to KT22-11 and KT22-12 are related to the former intersections being in the shallow, steam heated area of the epithermal system. These intersections likely represent the upper zone of the veins.

HIGHLIGHTS OF THE 2022 DRILLING RESULTS AT KATO INCLUDED:

- **KT22-11: Seta Vein:** 11.50 metres ("m") grading 6.42 g/t grams per tonne ("g/t") gold ("Au")
 - Including: 8.70 m grading 7.80 g/t Au
 - Including: 4.52 m grading 11.88 g/t Au
- **KT22-12: Seta Vein:** 26.10 m grading 3.06 g/t Au
 - Including: 10.20 m grading 4.88 g/t Au
 - Including: 5.05 m grading 5.76 g/t Au
- **KT22-13: Seta Vein:** 30.00 m grading 0.47 g/t Au
 - Including: 5.25 m grading 1.25 g/t Au
- **KT22-15: Seta Vein:** 17.50 m grading 0.29 g/t Au, Extends Seta Vein 400 m from KT22-11
- **KT22-15: Kamitake Vein:** 3.67 m grading 0.86 g/t Au

Historically, the property was drilled by the Japanese government's Metal Mining Agency of Japan ("MMAJ") in the 1990s and during that time intervals of high-grade gold including 17.5 metres grading 8.15 grams per tonne ("g/t") gold ("Au") in hole 5MAHB-2, and 18.65 metres grading 5.01 g/t Au in hole 7MAHB-1 were returned. Little work was conducted on the property since the 1990s until the Japanese Ministry of Economy Trade and Industry ("METI") granted the prospecting rights to Kazan Resources, Japan in December 2017. Kazan Resources was acquired by BeMetals in 2021.

From 2018-2019, Kazan completed several core holes which successfully intersected a zone of hydrothermal breccia near the adjacent main target vein. KT19-02A returned a number of zones of gold mineralization including 14 metres grading 2.10 g/t Au without intersecting the primary target vein. In 2020, a larger drill rig was deployed and reached the primary target zone, intersecting over 50 metres of hydrothermal breccia, vein breccia, stockwork, and banded quartz-adularia veins in hole KT20-010. The hole intersected 58.9 metres grading 0.76 g/t Au, including 7.4 metres at 2.99 g/t Au, and ended in 2.8 metres grading 3.1 g/t Au. The Table below illustrates these selected intersections.

BeMetals Corp.

Management's Discussion and Analysis of Financial Condition and Results of Operations June 30, 2024 and 2023

For more details on Kato, prior to the 2022 and 2023 drilling campaigns, see the technical report entitled, "Kato Gold Project, Japan NI 43-101 Technical Report" with an effective date of July 13, 2021 filed on SEDAR or on the Company website.

Summary of Exploration Expenses

The following table summarizes the exploration costs associated with the Company's Kato Gold Project as at June 30, 2024 and December 31, 2023:

Kato Gold Project			
	Balance December 31, 2023	Expenditure in 2024	Balance June 30, 2024
Direct exploration expenditures			
Consulting & wages	\$ 1,754,725	\$ 16,638	\$ 1,771,363
Drilling	4,279,167	39,147	4,318,314
Equipment	72,950	-	72,950
Land fees /Lease payments	45,348	21,902	67,250
Site logistics	1,460,122	27,110	1,487,232
Total direct exploration expenditures	7,612,312	104,797	7,717,109
Other expenditures			
Property acquisition costs	3,821,236	-	3,821,236
Share based compensation	82,946	-	82,946
Total	\$ 11,516,494	\$ 104,797	\$ 11,621,291

Other Kazan Gold Projects

The Todoroki Gold-Silver Project ("Todoroki" or the "Todoroki Project") is located on the southwestern region of Hokkaido and targets high-grade epithermal gold-silver mineralization encompassed within some 590 hectares of prospecting rights which include the historical Todoroki Mine discovered in 1896 – the oldest gold-and-silver mine in Hokkaido. Recorded production at the Todoroki Mine from 1925 until 1943 was approximately 200,000 ounces of Au, and 7.4 million ounces of Ag. Mining was temporarily halted in 1943 but resumed operation after WWII. Mining continued intermittently until the 1980s but production information for this period is uncertain.

Detailed geological studies by a Japanese group in the early 1970s concluded that in addition to the 13 known vein occurrences at Todoroki, there were numerous other undeveloped veins and alteration halos surrounding potential vein zones that required investigation. The veins are described as being composed of quartz, calcite, and adularia with local rhodochrosite. The veins are distributed over a 4.5km (East-West) by 1.5km (North-South) area and range in length between 500 and 1,500 metres, with documented widths ranging from 1 to more than 10 metres.

In 2021, a reconnaissance surface sampling program, completed by the Company, yielded several high-grade results, associated with outcrops near to historical mining, including 9.43 g/t Au and 442.5 g/t Ag over 2.1 metres and 9.29 g/t Au and 656.5 g/t over 2.5 metres. This confirms the significant high-grade silver component to the mineralization. Phases of rock chip and cut channel sampling along with geological mapping were also completed in 2022. Information from these programs have been integrated with data from the historical underground Todoroki Gold-Silver Mine. In 2023, a phase of scout drilling comprised of 449 metres in 2 drill holes was completed at the Todoroki Gold-Silver Project during last year's exploration field season. The drilling encountered quartz vein units with low tenor gold mineralization. Future drill targets will be designed to intersect deeper levels within the interpreted extensions of the historical Todoroki Mine vein system where higher-grade mineralization can be interpreted to be developed.

The Tashiro Gold Project ("Tashiro" or the "Tashiro Project") is located in northeastern Kyushu. The Tashiro Project is situated within the regional scale Hohi Graben, a major geological structure in this district that is associated with numerous historical gold mines and prospects known collectively as the Northern Kyushu epithermal gold province.

BeMetals Corp.

Management's Discussion and Analysis of Financial Condition and Results of Operations June 30, 2024 and 2023

In early 2023, BeMetals completed an airborne drone magnetic survey at Tashiro. This survey information was integrated with the historical drilling results to generate several compelling drilling targets for the property.

The high-grade quartz-gold veins of the Noya and Noya SW prospects within the Tashiro Project do not crop out. The area was initially explored for its geothermal energy potential with a single drill hole completed in 1952, and subsequently three more holes were completed in 1977. The existence of epithermal quartz-gold veins in the original drill core, with associated intense alteration, was first recognised by Morishita & Takeno and reported in 1989. Motivated by these results, in the early 1990s, MMAJ conducted drilling on the property as part of their search for the next Hishikari Gold Mine. A combination of mapping, soil sampling, geophysics, and drilling were undertaken and identified mineralized vein zones at the Noya and Noya SW Prospects, where numerous highly anomalous gold intervals were intersected. Some highlighted historical intersections of note on the Tashiro Project were included at;

Noya Prospect

- 4MAKC-1: 63.90 grams per tonne ("g/t") gold ("Au") & 16.70 g/t silver ("Ag") over 0.47m*
- 4MAKC-4: 28.60 g/t Au & 12.90 g/t Ag over 1.08m*
- 7MAKN-4: 41.60 g/t Au & 28.40 g/t Ag over 0.30m*

Noya SW Prospect

- 9MAKN-7: 1.67 g/t Au & 1.70 g/t Ag over 27.10m, *Including*: 3.38 g/t Au over 8.95m
- 9MAKN-8: 13.80 g/t Au & 16.70 g/t Ag over 1.30m*

The Konomai Project is located in northeastern Hokkaido. This land package is in the northern tip of a prolific zone of gold mining operations that were active in pre-World War II times. Most of the historical gold mines were shut down during the war years and were never reopened aside from Sumitomo Metal Mining's Konomai Mine, the largest in Hokkaido, which produced 3.1 million ounces of gold, and some other more modest producing mining operations. The Company has completed orientation and reconnaissance rock chip and soil sampling at this property.

The Hokusatsu Gold Project is located in southwestern Kyushu. This property is of interest due to its close proximity to two important gold occurrences on and adjacent to the property near the former mines of; Fuke (historical production of 125,000 ounces at 10.5 g/t Au) and Ohkuchi (historical production of 783,000 ounces at 13.1 g/t Au) mines. In addition, the high-grade Hishikari Gold Mine is located approximately 16 kilometres to the southeast of the Hokusatsu property. The Company has completed reconnaissance rock chip sampling in this project area, and is also compiling historical information from the Ohkuchi Mine with an aim to generating potential drill targets based upon the possible extension of un-mined areas of this mineralization within the property. The Company also intends to complete and compile with other geological data stream sediment sampling at the Hokusatsu property.

Summary of Exploration Expenses

The following table summarizes the exploration costs associated with the Company's Other Kazan Gold Projects as at June 30, 2024 and December 31, 2023:

BeMetals Corp.

Management's Discussion and Analysis
of Financial Condition and Results of Operations
June 30, 2024 and 2023

Other Kazan Gold Projects			
	Balance December 31, 2023	Expenditure in 2024	Balance June 30, 2024
Direct exploration expenditures			
Consulting & wages	\$ 953,333	\$ 73,365	\$ 1,026,698
Drilling	168,257	61,110	229,367
Land fees /Lease payments	38,212	26,772	64,984
Site logistics	363,636	56,678	420,315
Total direct exploration expenditures	1,523,438	217,925	1,741,364
Other expenditures			
Property acquisition costs	8,916,216	-	8,916,216
Share based compensation	39,298	-	39,298
Total	\$ 10,478,952	\$ 217,925	\$ 10,696,878

Outlook

BeMetals is focused on advancing the exploration and development of the Pangenji Copper Project in Zambia, while continuing to progress its portfolio of gold projects in Japan. The Company also constantly reviews other potential high value gold and base metal projects for possible new additions to the current portfolio.

From early August 2024 the company intends to commence aircore drilling at the Pangenji Project D-Prospect primarily aimed at expanding the footprint of the copper mineralization discovered by the Company to date, beneath the Kalahari sand cover. From the end of August, the Company will also start core drilling, in parallel with the aircore drilling, targeting the extension of the Nkala Zone copper mineralization.

Recent core drilling intervals of the Ingwe Shoot of the Nkala Zone at the D-Prospect include:

- **Hole D24-C1 intersected 16.16 metres grading 0.74% copper ("Cu") with 533 parts per million "ppm" cobalt ("Co"), including 5.50 metres grading 0.93% Cu with 701ppm Co.**
- **Hole D11-C3 intersected 23.20 metres grading 0.54% Cu with 263ppm Co, including 7.90 metres 0.92% Cu with 453ppm Co.**
- **Hole D22-C2 intersected 14.78 metres grading 0.42% Cu, including 4.88 metres grading 0.65% Cu.**
- **Drill hole D22-C1 intersected 18.10 metres grading 0.70% copper with 283ppm Co.**

These drill intersections approximate or exceed width and grades of deposits forming large scale copper mines and projects within the Domes Region of the prolific Zambian Copperbelt. The very similar geological hallmarks and features, to the Lumwana Mine deposits, including sulphide zonation patterns, from the Company's discovered copper mineralization at the D-Prospect will be used to target, in combination with aircore results, the next phase of diamond drilling.

The footprint of copper mineralization now extends for more than 1.7 kilometres along strike, with the mineralized intervals present from immediately beneath the sand cover, at approximately 25 metres depth, to some 275 metres vertically. The mineralization remains open along strike in both the SW and NE directions as well as down dip to the SE with additional exploration targets in close proximity to the D-Prospect. The Pangenji Project continues to deliver compelling results, indicating significant scale to the mineralization, and with ongoing drilling success, the potential for the discovery of a tier one copper deposit beneath the Kalahari sand cover.

In Japan, the Company intends to progress its Kazan Gold portfolio of high-quality exploration projects by defining and generating drill targets through field mapping and sampling with the integration of recent and historical drilling data.

BeMetals Corp.

Management's Discussion and Analysis of Financial Condition and Results of Operations June 30, 2024 and 2023

BeMetals' overall objective is to become a leading precious and base metals exploration, and potentially development, company through the acquisition and implementation of high-quality exploration projects and programs. This strategy is directed by the Board, key members of which have an extensive, proven track record in delivering considerable value in the mining sector through the discovery and building of mines. The Board, its advisors, and senior management also provide outstanding deal flow of project opportunities to the Company based upon an extensive international minerals business network of contacts.

Review of Financial Results

Total assets increased to \$31,479,856 at June 30, 2024, from \$30,346,749 at December 31, 2023. The most significant assets at June 30, 2024, were cash of \$667,631 (December 31, 2023: \$562,355), investments of \$99,230 (December 31, 2023: \$138,872), exploration advances of \$60,179 (December 31, 2023: \$195,104), and exploration and evaluation assets of \$30,564,390 (December 31, 2023: \$29,029,049).

The most significant changes in assets value at June 30, 2024 compared to December 31, 2023 were attributed to:

- Cash increased by \$105,276 to \$667,631 on June 30, 2024 compared to \$562,355 on December 31, 2023. The movement is primarily the net effect of expenditures of approximately \$1.7 million and cash raised from the issuance of the convertible debenture of \$2.0 million. The most significant cash expenditures were on the Company's exploration and evaluation assets where approximately \$0.7 million in cash was invested.
- Amounts receivable decreased by \$300,786 to \$26,177 on June 30, 2024 compared to \$326,963 on December 31, 2023 as a result of the refund of approximately \$300,000 of sales tax payments made in 2023 being received.
- Exploration and evaluation assets increased by \$1,535,341 to \$30,564,390 on June 30, 2024 compared to \$29,029,049 on December 31, 2023. The increase related to net expenditures of \$1.2 m on the Pangenji Copper Project and \$0.3 million on the Japanese Projects.

Three months ended June 30, 2024 and 2023

Comprehensive loss for the three months ended June 30, 2024, was \$710,724, an increase of \$79,261 compared to the comprehensive loss of \$631,464 for the three months ended June 30, 2023. The increase in comprehensive loss is largely due to the net effect of:

- A \$133,135 increase in the foreign exchange loss. During the three months ended June 30, 2024 the Company recognized a foreign exchange loss of \$61,580 compared to a foreign exchange gain of \$71,555 for the three months ended June 30, 2023.
- Increase in convertible debt expense of \$142,220 to \$142,220 for the three months ended June 30, 2024 compared to \$nil for the three months ended June 30, 2023. The increase is the result of the interest accrued on the B2Gold convertible debt notes which were issued in September, 2023 and January, 2024.

Six months ended June 30, 2023 and 2022

Comprehensive loss for the six months ended June 30, 2024, was \$1,415,205, an increase of \$276,348 compared to the comprehensive loss of \$1,138,857 for the six months ended June 30, 2023. The increase in comprehensive loss is largely due to the net effect of:

- A \$301,204 increase in the foreign exchange loss. During the six months ended June 30, 2024 the Company recognized a foreign exchange loss of \$231,817 compared to a foreign exchange gain of \$69,387 for the six months ended June 30, 2023.
- Stock based compensation decreased by \$137,770. During the six months ended June 30, 2024 stock based compensation was \$nil compared to \$137,770 during the six months ended June 30, 2023.

BeMetals Corp.

Management's Discussion and Analysis of Financial Condition and Results of Operations June 30, 2024 and 2023

- Increase in convertible debt expense of \$279,734 to \$279,734 for the six months ended June 30, 2024 compared to \$nil for the six months ended June 30, 2023. The increase is the result of the interest accrued on the B2Gold convertible debt notes which were issued in September, 2023 and January, 2024.

Liquidity and Capital Resources

As at June 30, 2024, the Company had working capital of \$704,513 (December 31, 2023: working capital of \$772,137). The Company has incurred negative cash flows from operations of \$551,934 and recorded a loss of \$1,375,563 for the six months ended June 30, 2024 (June 30, 2023: negative cash flows from operations of \$945,997 and loss of \$1,059,804, respectively), and has an accumulated deficit of \$26,568,414 as at June 30, 2024 (December 31, 2023: \$25,192,851).

Subsequent to June 30, 2024, on July 31, 2024, the Company closed a non-brokered private placement by issuing 48,406,000 units (the "Units") at \$0.10 per Unit for gross proceeds of \$4,840,600 (the "Private Placement"). Each Unit from the Private Placement consists of one common share in the capital of the Company (a "Share") and one-half Share purchase warrant. Each whole Share purchase warrant (a "Warrant") entitles the holder thereof to purchase one additional Share at an exercise price of \$0.18 per Share until July 31, 2025. The securities issued pursuant to the Private Placement are subject to a hold period under applicable Canadian securities laws expiring on December 1, 2024. In connection with the Private Placement, the Company paid cash finder's fees totaling \$95,280, in respect of certain sales under the Private Placement. B2Gold, a related party of the Company, subscribed for 22,000,000 Units for gross proceeds of \$2.2 million as part of the Private Placement. Other related parties of the Company, including directors, officers and other insiders, subscribed for an aggregate of \$812,500 in the Private Placement.

On September 8, 2023 the Company entered into a convertible debenture agreement with B2Gold Corp. ("B2Gold"), a related party, with respect to a non-brokered private placement to B2Gold of an unsecured convertible debenture (the "First Debenture") in the principal amount of C\$3,300,000. The First Debenture matures on September 8, 2028 and bears an interest rate of 7% per annum calculated and compounded annually in arrears on each anniversary date, being September 8 of each year. The principal amount of the First Debenture is convertible into common shares of BeMetals at the option of the holder at any time on or before the maturity date at a price of \$0.25 per common share. Accrued interest on the Debenture is convertible into common shares at the option of the holder on the maturity date at a price per common share that is the greater of \$0.25 and market price at the time of conversion (subject to prior approval by the TSX Venture Exchange).

On January 8, 2024 the Company entered into a further convertible debenture agreement with B2Gold with respect to a non-brokered private placement to B2Gold of an unsecured convertible debenture (the "Second Debenture") in the principal amount of C\$2,000,000. The Second Debenture matures on January 8, 2029 and bears an interest rate of 7% per annum calculated and compounded annually in arrears on each anniversary date, being January 8 of each year. The principal amount of the Second Debenture is convertible into common shares of BeMetals at the option of the holder at any time on or before the maturity date at a price of \$0.25 per common share. Accrued interest on the Second Debenture is convertible into common shares at the option of the holder on the maturity date at a price per common share that is the greater of \$0.25 and market price at the time of conversion (subject to prior approval by the TSX Venture Exchange).

The financial statements for the six months ended June 30, 2024 are prepared on a going concern basis that assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The Company has incurred losses since inception and has no source of recurring revenue. The success of the Company is dependent upon the ability of the Company to obtain necessary financing to continue their exploration and development activities, the confirmation of economically recoverable reserves, and upon establishing future profitable production, or realization of proceeds on disposal. The Company will require additional funding to maintain its activities and operations for the next twelve months. All of the preceding indicates the existence of a material uncertainty that may cast significant doubt on the Company's ability to continue as a going concern. The financial statements for the three and six months ended June 30, 2024 do not give effect to the adjustments that would be necessary to the carrying value and classification of assets and liabilities should the Company be unable to continue as a going concern.

BeMetals Corp.

Management's Discussion and Analysis
of Financial Condition and Results of Operations
June 30, 2024 and 2023

Summary of Quarterly Results

	Q2 2024	Q1 2024	Q4 2023	Q3 2023
Revenue	\$ -	\$ -	\$ -	\$ -
Loss	(657,517)	(718,046)	(628,206)	(277,825)
Comprehensive loss	(710,724)	(704,481)	(675,233)	(290,525)
Basic and diluted loss per share	(0.00)	(0.00)	(0.00)	(0.00)

	Q2 2023	Q1 2023	Q4 2022	Q3 2022
Revenue	\$ -	\$ -	\$ -	\$ -
Loss	(512,038)	(547,766)	(13,036,424)	(524,605)
Comprehensive loss	(631,464)	(507,393)	(12,998,643)	(545,675)
Basic and diluted loss per share	(0.00)	(0.00)	(0.07)	(0.00)

The increase in comprehensive loss for Q4 2022 was the result of the write-down of the South Mountain Project resulting in an expense of \$12,675,966 being charged to the income statement in the period.

Outstanding Share Data

Issued and fully paid common shares

The Company issued no shares during the six months ended June 30, 2024 and as at June 30, 2024, there were 177,352,545 shares outstanding.

On July 31, 2024, the Company issued 48,406,000 shares as part of the non-brokered private placement whereby the Company issued 48,406,000 units at \$0.10 per Unit for gross proceeds of \$4,840,600. Each Unit from the Private Placement consists of one common share in the capital of the Company and one-half Share purchase warrant (a "Warrant"). As at the date of this report there were 225,758,545 shares outstanding.

Warrants

During the six months ended June 30, 2024 no warrants were exercised or issued by the Company and as at June 30, 2024 there were no warrants outstanding.

On July 31, 2024, the Company issued 24,203,000 Warrants as part of the non-brokered private placement. Each Warrant entitles the holder thereof to purchase one additional common share at an exercise price of \$0.18 per Share until July 31, 2025. As at the date of this report there were 24,203,000 warrants outstanding.

Share options

During the six months ended June 30, 2024, no share options were exercised, issued or cancelled by the Company.

As at June 30, 2024 and the date of this report, there were 16,995,000 options outstanding.

Related Party Transactions

Included within fees and salaries are amounts paid to key management personnel, which are those persons having authority and responsibility for planning, directing and controlling the activities of the Company as a whole. The Company has determined that key management personnel consist of members of the Company's Board of Directors and corporate officers.

BeMetals Corp.

Management's Discussion and Analysis of Financial Condition and Results of Operations June 30, 2024 and 2023

During the six months ended June 30, 2024, key management personnel compensation, including directors and officers, was comprised of \$347,512 (2023 - \$436,763), of which \$nil related to share-based compensation, \$330,494 related to fees and salaries and \$17,018 was capitalized to Exploration and evaluation assets (2023 - \$91,254, \$254,718 and \$90,791 respectively).

During the six months ended June 30, 2024, the Company paid or accrued fees of \$nil (2023 - \$110,236) to B2Gold that were capitalized to Exploration and evaluation assets. On January 8, 2024 the Company issued a \$2.0 million convertible debenture to B2Gold. On July 31, 2023 the Company reached an agreement with B2Gold for an unsecured \$1.75 million Bridge Loan (Note 6) that was subsequently applied as partial subscription towards a \$3.3 million Debenture which was entered into on September 8, 2023.

As at June 30, 2024 amounts included in accounts payable and accrued liabilities due to related parties was \$nil (December 31, 2023: \$31,627).

On July 31, 2024, B2Gold, a related party of the Company, subscribed for 22,000,000 Units for gross proceeds of \$2.2 million as part of the Private Placement. Other related parties of the Company, including directors, officers and other insiders, subscribed for an aggregate of 8,125,000 Units for gross proceeds of \$812,500 in the Private Placement.

Critical Accounting Policies and Estimates

The Company has prepared the accompanying financial statements in accordance with IFRS. Material accounting policies are described in Note 3 of the Company's financial statements as at and for the six months ended June 30, 2024, except for newly adopted accounting policies as noted below, if any.

The preparation of financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of expenses during the reporting period. Actual outcomes could differ from these estimates.

Financial Instruments and Financial Risk Management

Financial Instruments

Cash, term deposit, amounts receivable, exploration advances, trade and other payables, derivative liability and loan are carried at amortized cost which approximates fair value due to the short-term nature of these instruments. Common shares of publicly traded companies included in investments are classified as FVOCI. The derivative liability is classified as FVTPL.

Financial Risk Management

The Company is exposed in varying degrees to a variety of financial instrument related risks. The type of risk exposure and the way in which such exposure is managed is provided as follows:

Credit risk

Credit risk arises from the potential for non-performance by counterparties of contractual financial obligations. The Company's exposure to credit risk is on its cash and amounts receivable. The Company reduces its credit risk by maintaining its bank accounts at a large international financial institution. The maximum exposure to credit risk is equal to the carrying value of these financial assets.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company has a planning and budgeting process in place to help determine the funds required to support the Company's normal operating requirements on an ongoing basis. The Company attempts to ensure there is sufficient access to funds to meet

BeMetals Corp.

Management's Discussion and Analysis of Financial Condition and Results of Operations June 30, 2024 and 2023

on-going business requirements, taking into account its current cash position and potential funding sources. As at June 30, 2024, the Company had current liabilities of \$51,545 and working capital of \$704,513.

The Company's Loan with a principal owing of US\$5,000,000 matures on August 4, 2025. The Loan bears interest at a rate of 4.7% per annum which can be paid or accrued annually at the discretion of the Company. The Company's \$3,300,000 Debenture matures on September 8, 2028 and bears interest at a rate of 7.0%. The Company's \$2,000,000 Debenture matures on January 8, 2028 and bears interest at a rate of 7.0%. The Company also has commitments or milestone value option payments arising in 2024, and beyond, related to the Pangen Copper Project.

Foreign currency risk

Foreign currency risk is the risk that the fair values of future cash flows of a financial instrument will fluctuate because they are denominated in currencies that differ from the Company's functional currency. The Company's reporting currency is the Canadian dollar and major purchases are transacted in Canadian and US dollars and the Japanese Yen. A portion of the Company's exploration and evaluation expenditures are incurred in Zambia, but are predominantly transacted in US dollars. The Company maintains Canadian dollar and US dollar bank accounts in Canada and Japanese Yen ("¥") bank accounts in Japan. The Company is subject to gains and losses from fluctuations in the US dollar and the Yen against the Canadian dollar. The Company held a net monetary liability position of \$7,132,942 in US dollars and a net monetary asset position of \$245,112 in Japanese Yen as of June 30, 2024, with the effect on profit or loss before tax of a 10% fluctuation to the CAD dollar being \$688,782.

Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to interest rate risk relates to its ability to earn interest income on cash balances at variable rates and interest payable on the B2Gold Loan and convertible debenture which are both at a fixed rate. Changes in short-term interest rates will not have a significant effect on the fair value of the Company's cash account.

Price risk

The Company's ability to raise capital to fund exploration or development activities is subject to risk associated with fluctuations in the market prices of base and precious metals including copper, zinc, silver, gold, and lead, and the outlook for these metals. The Company does not have any hedging or other derivative contracts respecting its operations. In addition, the Company's investments which are comprised of publicly traded equity securities are subject to price risk.

Market prices for metals historically have fluctuated widely and are affected by numerous factors outside of the Company's control, including, but not limited to, levels of worldwide production, short-term changes in supply and demand, industrial and retail demand, central bank lending, and forward sales by producers and speculators. The Company has elected not to actively manage its commodity price risk, as the nature of the Company's business is in exploration.

Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. The Company closely monitors individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company.

The Company is exposed to price risk with respect to its investment in Thunder Mountain, which trades on the OTCQB under the symbol 'THMG'.

Risks and Uncertainties

The risk factors described below summarize and supplement the risk factors contained in the Company's filing statement dated July 18, 2018, (the "Filing Statement") and available on SEDAR+ at www.sedarplus.ca and should be read in conjunction with the more detailed risk factors outlined in the Filing Statement:

BeMetals Corp.

Management's Discussion and Analysis of Financial Condition and Results of Operations June 30, 2024 and 2023

The Company is engaged in the acquisition and exploration of natural resource properties, an inherently risky business, and there is no assurance that economically recoverable resources will ever be discovered and subsequently put into production. Most exploration projects do not result in the discovery of economically recoverable resources.

The operation of mineral exploration and development properties requires licenses, permits and rights from various governmental authorities. The Company anticipates that it will be able to obtain and maintain all necessary licenses, permits and rights to carry on the activities which it intends to conduct, and that it intends to comply in all material respects with the terms of such licenses, permits and rights. However, there can be no guarantee that all licenses, permits and rights which the Company may require for any exploration or development of mining operations will be obtainable on reasonable terms or in a timely manner, or at all, that such terms will not be adversely changed, that required extensions will be granted, or that the issuance of such licenses, permits or rights will not be challenged by third parties. Delays in obtaining or a failure to obtain such licenses, permits or rights or extension thereto, challenges to the issuance of such licenses, permits or rights, whether successful or unsuccessful, changes to the terms of such licenses, permits or rights, or a failure to comply with the terms of any such licenses, permits or rights that the Company has obtained, could have a material adverse effect on the Company by delaying, preventing or making more expensive exploration, development and/or production. The Company will endeavour to secure the renewal of all required licenses, permits and rights, where required, through the timely submission of renewal applications and where appropriate new applications which comply with the various exploration and mining regulations in the countries and regions in which it is active. While best efforts are made with such applications to ensure their compliance with all legal and best practices technical standards, in liaison with the relevant authorities in each region, the Company cannot guarantee all such applications will be successful.

Exploration activities require large amounts of capital. There is a risk that during the current difficult economic situation the Company will not be able to raise sufficient funds to finance its projects to a successful development and production stage. While the Company's management and technical team carefully evaluate all potential projects prior to committing the Company's participation and funds, there is a high degree of risk that the Company's exploration efforts will not result in discovering economically recoverable resources. The Company depends on the business and technical expertise of its management team and there is little possibility that this dependence will decrease in the near term.

There is no guarantee that the Company will exercise its option pursuant to the Pangen Agreement. The completion and exercise of this option is affected by the success of the Company's exploration efforts and is contingent upon certain conditions precedent as well as the price of metals which are affected by numerous factors including inflation, investor speculative activities, relative exchange rate of the U.S. dollar to other currencies, global and regional demand and production, global and regional political and economic conditions, and production costs in major producing regions. These factors are beyond the Company's control and are impossible to predict.

Off-Balance Sheet Arrangements

The Company does not have any off-balance sheet arrangements.

Proposed Transactions

The Company does not have any proposed transactions as at June 30, 2024 other than as disclosed elsewhere in this document.

Management's Report on Internal Control over Financial Reporting

In connection with National Instrument ("NI") 52-109 (Certification of Disclosure in Issuer's Annual and Interim Filings) adopted in December 2008 by each of the securities commissions across Canada, the Chief Executive Officer and Chief Financial Officer of the Company will file a Venture Issuer Basic Certificate with respect to the financial information contained in the unaudited condensed interim consolidated financial statements and the audited annual consolidated financial statements and respective accompanying Management's Discussion and Analysis. The Venture Issuer Basic Certification does not include representations relating to the establishment and maintenance of disclosure controls and procedures and internal control over financial reporting, as defined in NI 52-109.

Qualified Person

The technical information included in this MD&A has been reviewed and approved by John Wilton, CGeol FGS, the Company's CEO and President and a "Qualified Person" as defined by National Instrument 43-101 standards.

Caution Regarding Forward Looking Information

This Management Discussion and Analysis may contain certain "forward-looking statements" within the meaning of Canadian securities legislation. Forward-looking statements are statements that are not historical facts; they involve predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance and are generally, but not always, identified by the words "expects", "plans", "anticipates", "believes", "intends", "estimates", "projects", "aims", "potential", "goal", "objective", "prospective", and similar expressions, or that events or conditions "will", "would", "may", "can", "could" or "should" occur. Forward-looking statements are based on the beliefs, estimates and opinions of the Company's management on the date the statements are made and they include a number of known and unknown risks and uncertainties and other factors. Consequently, there can be no assurances that such statements will prove to be accurate and actual results and future events could differ materially from those anticipated in such statements.

The following table outlines certain significant forward-looking statements contained in this MD&A and provides the material assumptions used to develop such forward-looking statements and material risk factors that could cause actual results to differ materially from the forward-looking statement:

Forward looking information	Assumptions	Risk Factors
The Company's anticipated plans, costs, timing and capital for future development of the Company's mineral exploration properties.	Financing will be available for future exploration and development of the Company's properties; the actual results of the Company's exploration and development activities will be favourable; exploration and development costs will not exceed the Company's expectations; the Company will be able to retain and attract skilled staff, all requisite regulatory and governmental approvals for exploration projects and other operations will be received on a timely basis upon terms acceptable to the Company, and applicable political and economic conditions are favourable to the Company; the price of precious and base metals and applicable interest and exchange rates will be favourable to the Company; no title disputes exist with respect to the Company's properties.	Precious and base metals price volatility; uncertainties involved in interpreting geological data and confirming title to acquired properties; the possibility that future exploration results will not be consistent with the Company's expectations; availability of financing for and actual results of the Company's exploration and development activities; increases in costs; environmental compliance and changes in environmental and other local legislation and regulation; interest rate and exchange rate fluctuations; changes in economic and political conditions; the Company's ability to retain and attract skilled staff.
The Company's ability to carry out anticipated exploration on its mineral exploration properties.	The operating and exploration activities of the Company for the next twelve months and the costs associated therewith, will be consistent with the Company's current expectations; debt and equity markets, exchange and interest rates and other applicable economic conditions are favourable to the Company.	Changes in debt and equity markets; timing and availability of external financing on acceptable terms; increases in costs; environmental compliance and changes in environmental and other local legislation and regulation; interest rate and exchange rate fluctuations; changes in economic conditions.

Management's Discussion and Analysis
of Financial Condition and Results of Operations
June 30, 2024 and 2023

Forward looking information	Assumptions	Risk Factors
Plans, costs, timing and capital for future exploration and development of the Company's property interests, including the costs and potential impact of complying with existing and proposed laws and regulations.	Financing will be available for the Company's exploration and development activities and the results thereof will be favourable; actual operating and exploration costs will be consistent with the Company's current expectations; the Company will be able to retain and attract skilled staff; all applicable regulatory and governmental approvals for exploration projects and other operations will be received on a timely basis upon terms acceptable to the Company; the Company will not be adversely affected by market competition; debt and equity markets, exchange and interest rates and other applicable economic and political conditions are favourable to the Company; the price of precious and base metals will be favourable to the Company; no title disputes exist with respect to the Company's properties.	Precious and base metals price volatility, changes in debt and equity markets; timing and availability of external financing on acceptable terms; the uncertainties involved in interpreting geological data and confirming title to acquired properties; the possibility that future exploration results will not be consistent with the Company's expectations; increases in costs; environmental compliance and changes in environmental and other local legislation and regulation; interest rate and exchange rate fluctuations; changes in economic and political conditions; the Company's ability to retain and attract skilled staff.
Plans, costs and timing of the issuance of licenses, permits and rights.	The Company will be able to obtain and maintain all necessary licenses, permits and rights necessary to carry out its planned activities; the Company will be successful in any required renewal of its licenses, permits and rights through the timely submission of renewal applications and, where appropriate, new applications; the Company's understanding of the various exploration and mining regulations regarding licenses, permits and rights in the countries and regions in which it is active is accurate.	Licenses, permits and rights, or the renewal thereof, which the Company may require for any exploration or development of mining operations may not be obtainable on reasonable terms or in a timely manner, or at all; the terms of any licenses, permits and rights may be adversely changed; any required extensions may not be granted; the issuance of licenses, permits or rights may be challenged by third parties.
Management's outlook regarding future trends.	Financing will be available for the Company's exploration and operating activities; the price of precious and base metals will be favourable to the Company; required regulatory approvals for the acquisition of mineral properties will be received.	Precious and base metals price volatility; changes in debt and equity markets; interest rate and exchange rate fluctuations; changes in economic and political conditions.

Inherent in forward looking statements are risks, uncertainties and other factors beyond the control of the Company's ability to predict or control. Please make reference to those risk factors referenced in the "risk factors" section above and as discussed in greater detail in the Company's various filings on SEDAR+ (www.sedarplus.ca) with Canadian Securities Regulators. Readers are cautioned that the above chart does not contain an exhaustive list of the factors or assumptions that may affect the forward-looking statements, and that the assumptions underlying such statements may prove to be incorrect. Actual results and development are likely to differ, and may differ materially, from those expressed or implied by the forward-looking statements outlined in this MD&A.

Forward-looking statements include known and unknown risks, uncertainties and other factors that may cause the Company's actual results, performance or achievements to be materially different from any of its future results, performance or achievements expressed or implied by forward-looking statements. All forward-looking statements herein are qualified by the cautionary statement. Accordingly, readers should not place undue reliance on forward-looking statements. The Company undertakes no obligation to update publicly or otherwise review any forward-looking statements whether as a result of new information or future events or otherwise, except as may be required by law. If the Company does update one or more forward-looking statements, no inference should be drawn that it will make additional updates with respect to those or other forward-looking statements, unless required by law.
